1) **Write down the step-by-step process for creating the personal webpage and deployment in GitHub Pages.**
   - First, I have created the webpage layout using html and added the whole site to the GitHub repo and saved every step to that repo.
   - Then I have created the menu bar and added animation by separating each page scrolling transition .
   - Then I have added the typewriter effect to the home page.
   - After that I have developed the flip card for education and the project page and edited that to view port so that it will be nice to view .
   - And after that I have added the images and description to the flip card.
   - After that I have added GitHub link to the GitHub icon for each and every project I have created.
   - After that I have created the about page and added my details.

2) **Write down the 10 points you learned during the creation of this webpage.**
   - I have learned lot during this project.
   - I have learned how to give transition effect.
   - Typewriting effect.
   - Sticky scrolling bar.
   - Highlighting effect.
   - Flip card.
   - Adding link to an image.
   - Using anchor tag to travel within the page.
   - Learned how to give gradient effect.
   - Learned how to give skills graph.
   - Learned a lot about using viewport.

3) Write down why everyone needs a personal webpage.

These days everything has become as online event. Even dating also came to a stage of online world. Now if everyone has a personal website it is easy for every single need to apply work or changing job. It also helps a lot of people to understand about a particular person . These websites helps a lot to learn about web developing and its features. It provide instant portfolio so you should not worry to carry the CV with you every time you get a chance. Now a days opportunities are vastly available in every sector so the need to personal website increased a lot since it provides lots of information within a click to respective peoples.

4) Deploy your personal webpage in GitHub pages (Github.io), share your website link, code and Screenshots.
